Terms of Acceptance

When a patient seeks chiropractic health care and we accept a patient for such care, it is essential for both to be working towards the same objectives.

Chiropractic has only one goal. It is important each patient understand both the objective and the method that is used to attain it.

Adjustment: An adjustment is the specific application of force to facilitate the body's correction of vertebral subluxation. Our chiropractic method of correction is by specific adjustment of the spine.

Health: A state of optimal physical, mental and social well-being, not merely the absence of disease or infirmity.

Vertebral Subluxation: A minor misalignment of the segment of the spine (vertebrae), causing an irritation to a nerve, with a loss of normal function; an interruption of communication from the brain to any cell, tissue, or organ in the body.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxation. However, if during the course of a chiropractic spinal examination, we encounter non-chiropractic or unusual finding, we will advise you. If you desire advice, diagnosis or treatment for those finding, we will recommend that you seek the services of a health care provider who specializes in that area.

Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. **OUR ONLY OBJECTIVE** is to eliminate a major cause of interference within the nervous system. Our only method is specific adjusting to correct vertebral subluxation.

I, _____, have read and fully understand the
(Print Name)
above statements.

All questions regarding the doctor's objectives pertaining to my care in this office have been answered to my complete satisfaction. I therefore accept chiropractic care on this basis.
