## July 2008 Issue

### How Much are You Worth?

Some time back an article was published which calculated the value of all the chemicals in the human body. At the going price, the final figure was somewhere around 98 cents! What the article was saying was that the human body is really a combination of water (hydrogen and oxygen), carbon, and such minerals such as iron, potassium, sodium, and numerous other elements.

If the body were broken down into its simplest components, the market value would be less than a dollar. In one sense that tends to be quite humbling. However, there are some fantastic ideas to think about. It goes without saying that we place more value than a dollar on a human life.

Tell the parents who are looking into the face of a newborn that they little baby,

because of its size, it not even worth 98 cents. The “being” part of a human being makes the value so high that it cannot be measured in dollars and cents.

But the 98 cent chemical value of a human is also a misleading figure. True, that may be the value of the body in its simplest state, but a body does not exist that way. Blood is made up of potassium, sodium, hydrogen, etc., however the approximately eight pints in your body are highly valued. Interferon is a substance your body produces from the above elements.

Scientists are just now beginning to produce it commercially for the treatment of disease, at a cost of millions of dollars per ounce! Any diabetic will tell you the expense of a day’s supply of insulin, which is not even human insulin. Can you imagine the

value of insulin produced in exactly the right human quality for your particular body and in the right amount? Adrenaline, cortisone, and all the other hormones are nothing but carbon, hydrogen, oxygen, and the other elements valued at 98 cents.

What is it then, that increased their value so greatly? It is the inborn wisdom of your body, which is able to transform that 98 cents worth of substances into chemical compounds and fluids worth millions of dollars. It is this same wisdom which, day in and day out, organizes every cell in the body and keeps your body working as it was intended.

**The inborn wisdom of your body transforms pennies worth of substances into extremely valuable chemical compounds.**

### News for July

[Click Here](#) to check our Upcoming Events for updated office hours for the month of July as well as other things we have going on here at Doctor V's.

Thank you for all the referrals during the month of June! Remember, you can have your friends and family download their About You forms on our website and bring with them to the office. [Click Here](#)

Thank You!

### Doctor V's Chiropractic Perks™

Refer your friends and family members so we can help them benefit from chiropractic adjustments.

Our Chiropractic Perks™ program will reward you and help you save money on future chiropractic care.

**Walk-In Adjustments Only \$20 Anytime!**

**All Walk-In! • Little or no Wait**

**Monthly and Family Plans Available**
